

FAX Enable™

QUICK START GUIDE

Congratulations on your new Fax Enable adapter. In just a few short steps you will be able to setup your Fax Enable device to start sending and receiving fax documents.

- 1 Connect the RJ11 cable from your fax machine to Line 1 on the back of the Fax Enable Device
- 2 Connect the supplied RJ45 Ethernet cable to the WAN port of the Fax Enable adapter
- 3 Connect the other end of the RJ45 Ethernet cable to an open WAN Ethernet port /cable modem/DSL modem/router/ or switch
- 4 Plug in your new Fax Enable device using the supplied AC Adapter
- 5 Your device will now take 1-2 minutes to configure itself to the vFax network

Enjoy your new Fax Enable'd service!
